DATA ANALYST

Workplace: KRAKOW

We are looking for a person with very strong statistical and mathematical skills as well as proficiency with SQL and statistical tools like R or jupyter. The person will join our 9-people team.

Responsibility and challenges:
- Performing statistical data tests and analysis based on large amount of data (transactions)
- Direct contact both with analytical department on the Customer side and Project Team on CRIF side
- Understanding the data received from the Customer and setting the goal of the analysis (for example finding transactions rejection patterns)
- Building statistical models which can be used in products offered by the Company (risk management, antifraud model)
- Constant improvement of current statistical and decision models
- Maintenance and development of business monitoring solutions in the Company

Expected skills:
- Solid knowledge about the specificity of the data related to the polish companies (B2B sector) and private individuals (B2C sector)
- Deep awareness of data protection issues related to private individuals in Poland
- Good presentation skills at the meeting with Customers
- Ability to learn the Crif Services Platform and detailed data structures it includes
- Very good communication skills (both oral and written) in Polish and English languages
- Strong analytical hard skills – **statistical methodologies of data analysis, data mining, operating the large number of data**
- Excellent**, practical knowledge of SQL, Python, MS Excel, jupyter**

Our offer:
- A stable job in a fast growing environment.
- Benefit package (private medical care, Multisport, meal/restaurants discounts etc.).
- Fresh different fruits in the office every day.

- Language classes in the office (English & German) - individual or in a team.
- Car and bike parking.

If that sounds interesting, join us! Contact as via email: career.pl@crif.com
