SOFTWARE DEVELOPER Regular | SkyMinder

Workplace: KRAKOW

CRIF Poland is looking for a **Java Software Engineer** to join the development team in Kraków that work on a '**SkyMinder**' project.

What is SkyMinder? SkyMinder is the CRIF platform which provides access to various report types to help business take better decisions related to commercial risk data. All countries around the world are available on SkyMinder, it means reports on all entities considered as companies are available in the platform including reports which must be freshly investigated and delivered to customer.

What is our team's role in the project? The platform is implemented by our development team in cooperation with business analytics from CRIF Headquarter. The development team is **responsible fully for the platform starting from design of requested feature, implementation, testing, delivery to production with support of dedicated team.**

Sounds interesting, doesn't it?

We need a quickly learning, **autonomous specialist** that will help us **move our software to the next** level by applying optimal **architecture** design, modern technologies and best software development practices. This is an offer for a Professional wishing to make a non-trivial contribution to a serious software project as the next step in her or his career.

Requirements:

- Proven record of 3-4 years of experience with large-scale software architecture.
- Hands-on experience with Java, Spring, SQL database engine (preferably Oracle or Microsoft SQL Server), a web application UI framework.
- Knowledge of architectures of distributed systems.

- Practice with Java web applications and web services.
- Experience at working with business requirements.
- Ability to work efficiently in a distributed, international team.
- Good English, both spoken and written.
- Team spirit: We strongly believe that cool ideas are born by teamwork.

Responsibilities:

- Design and implement new features and change requests, involving the full technology stack, from the user interface down to the database.
- Investigate and fix software issues.
- Work with complex business requirements.
- Maintain superb relations with colleagues inside and outside the team.
- Communicate efficiently with colleagues in Krakow and other CRIF units on daily basis.

Our offer:

- Extensive social package.
- Stable employment in a fast growing environment.
- Small teams and friendly atmosphere.
- Possibility to have personal influence on the technological landscape of the project.
- Language classes on different levels in the office (English and German).
- Every day different fresh fruits in the office.
- Flexible hours.
- Possibility to work from home.
